

Reduce your carbon footprint and minimise your energy and water consumption costs.

A healthy bottom line is crucial to any business. GreenCity Utilities are an independent provider with access to the best commercial tariffs on the market, enabling us to provide your business with a solution that ensures cost savings, now and in the future. On top of this, we also help your business reduce its carbon footprint with 100% renewable energy tariffs.

Gas & Electricity

Fluctuations in energy prices is a deterrent for many businesses when looking for the best deal. Let us take care of the hard work for you. We review the market and search for the right supplier at the right tariff, to suit your specific business requirements.

You'll be assigned an Account Manager who has access to all the major electricity and gas suppliers. Your dedicated energy expert will set to work to fully understand your business and its challenges before searching the market for the deals that'll reduce the cost of your business's energy. This can be savings from 10% to a staggering 50%.

We also lock in energy prices now for contracts that start as far as three years later, guaranteeing a cut in your energy bills no matter when your existing contract ends.

Water

Water industry deregulation means a competitive market place.

Analysis

We check your business tariff to ensure you're getting the best deal. We also uncover possible overpayments, savings and potential refunds available to your business. We deliver a rigorous audit process firstly analysing all your water invoices and charges.

Survey and Report

We then conduct a full survey of your site (including a full analysis of the consumption levels within areas identified as 'above acceptable levels'). Finally we produce a comprehensive report identifying our findings, enabling you to make an informed decision on next steps.

Implementation

We then set to work in correcting your charges and recovering any monies overpaid.

Product Sheet Utilities

LED

Commercial LED lighting solutions offer your business several benefits, such as increased lighting performance, lower maintenance costs, lower running costs and a reduction in your impact on the environment. You'll be well on your way to any green accreditation you're working towards. Additionally, we can facilitate leasing options allowing you to improve your working environment with zero capital outlay.

“

GreenCity Solutions have provided Peterborough United Football Club with phone lines, phone system and our superfast gigabit internet connection. The process from signing on the dotted line to installation was handled professionally and with care to ensure minimum disruption. All ongoing support has been provided faultlessly and hassle free.

”
